SHIFTING INCOMPLETE STORIES
OF ANXIETY TOWARDS

TRUTH

How To Use This Book

Depending on what you are looking for, you can use this book in a variety of ways. Feel free to skim, read every line, or just check out our videos.

We believe important topics call for important conversations which is why some of our material is presented via videos. In order to access the videos, you will need to click the link if you are reading via a digital device such as Kindle. If you have a physical copy of the book, you can access the links via QR codes.

A QR Code looks like this and can be scanned using your device's camera:

On an iOS device, simply open the camera app and point your camera over the code. A notification will pop up, asking if you would like to head to YouTube.

On an Android device, you will need to download a QR code app. Our team recommends several options, all of which are free as of this printing:

- QR & Barcode Scanner
- QR Code Reader
- Free QR Scanner by Avira
- QR DROID PRIVATE
- Kaspersky QR Scanner

I Am Glad You Are Here...

The world needs individuals who care for one another. If you are reading this book because you want to provide encouragement and support to those who struggle, I want to say how proud of you I am.

I also want to acknowledge its hard to know *how* to help someone. We may want to be the one to provide a solution, but often, this is out of our control.

Even so, I believe learning about the issue can help us know how to be there for others. When we match our concern and empathy, along with insightful knowledge, it can help us to be prepared to point others in the right direction.

I Want To Be Clear In The Beginning...

Unless you are a professional who has been trained to know how to step in and offer solutions to those who struggle with anxiety, you may not be able to fix the root cause of why someone you care for struggles with mental health.

This does not mean, however, that they do not need you. Having support from someone who has insight into the issues surrounding mental health and who knows what professional resources are available—is key. The best thing anyone who is struggling with anxiety can do is seek out professional care. We can not take away the good or bad thoughts or feelings of another. But, we all can strive to be supportive friends and loved ones. The fact you are reading this tells me this is who you want to be.

The things which you and I *can* do, is seek to be the most prepared we can be in order to be individuals who can point others towards getting the best possible help they can.

My goal is to help you to learn how to understand the complex topic of anxiety a little bit better, so you have insight into how to care for those who may struggle.

If you or someone you care for is in danger of harm, please contact one of the numbers below or turn to the resource section at the back of this book.

SHIFTING THE NARRATIVE
of lost hope

What Is Anxiety?

Anxiety is a natural, physical response to fear or stress. While everyone faces anxiety at various points in their life, and is quite normal, if prolonged symptoms such as rapid or racing heart, difficulty breathing, persistent, unsubstantiated worrying, or panic attacks—it may be time to consider consulting the advice of a professional to determine if you can receive help for an anxiety disorder.

The Mayo Clinic names common anxiety signs and symptoms as:

- Feeling nervous, restless or tense
- Having a sense of impending danger, panic or doom
- Having an increased heart rate
- Breathing rapidly (hyperventilation)
- Sweating
- Trembling
- Feeling weak or tired
- Trouble concentrating or thinking about anything other than the present worry
- Having trouble sleeping
- Experiencing gastrointestinal (GI) problems
- Having difficulty controlling worry
- Having the urge to avoid things that trigger anxiety¹

The US Department Of Health And Human Services states the five most common forms of anxiety disorders are:

- Generalized Anxiety Disorder
- Obsessive-Compulsive Disorder (OCD)
- Panic Disorder
- Post-Traumatic Stress Disorder (PTSD)
- Social Phobia (or Social Anxiety Disorder)²

Though it may be scary to think about anxiety and how it could affect our everyday lives, looking into the causes, treatment options, and ways to manage anxiety can offer a sense of control many are looking for.

Fear is a powerful thing. And while it is healthy as a short-term warning light—it serves as a terrible master.

We welcome you to come with us on a journey as we look at what it means to shift an incomplete story of anxiety towards truth.

What Is Anxiety? - Video Discussion

<https://youtu.be/-tC1EQq-Low>

Why Does Anxiety Happen?

Anxiety is a natural response to fear or stress. However, when an individual is constantly fearful, worried, or stressed—either due to current or past physical, mental, or emotional triggers, this has pushed beyond the boundaries of normal, everyday anxiety.

If that has occurring in your life, or in the life of someone you care for, know you are not alone—and there is no shame. This is a real situation happening in your life.

According to [Healthline.com](https://www.healthline.com)³, the primary causes of anxiety disorders include:

- Trauma
- Stress
- Genetics
- Personality
- Gender³

[Healthline.com](https://www.healthline.com)⁴ also shares 11 triggers, which spark anxiety incidents in someone's life. These include:

- Health Issues
- Medications
- Caffeine
- Skipping Meals
- Negative Thinking
- Financial Concerns
- Parties Or Social Events
- Conflict
- Stress
- Public Events Or Performances
- Personal Triggers⁴

If you wonder if it is time to see a doctor, the Mayo Clinic⁵ suggests involving healthcare professionals when:

- You feel like you're worrying too much and it's interfering with your work, relationships or other parts of your life
- Your fear, worry or anxiety is upsetting to you and difficult to control
- You feel depressed, have trouble with alcohol or drug use, or have other mental health concerns along with anxiety
- You think your anxiety could be linked to a physical health problem
- You have suicidal thoughts or behaviors — if this is the case, seek emergency treatment immediately⁵

If you do not believe it is time to consult professional guidance, but you do want private support, consider the ReachOut.com Apps Collection available at:

<https://au.reachout.com/tools-and-apps> which hosts 53 different professionally-reviewed tools and apps which promote mental health.

Why Does Anxiety Happen? - Video Discussion

<https://youtu.be/-or3QV10u5o>

How Many Individuals Struggle?

- Anxiety disorders are the most common mental illness in the U.S., affecting 40 million adults in the United States age 18 and older, or 18.1% of the population every year.⁶
- An estimated 31.9% of adolescents had any anxiety disorder.⁷
- According to the 2016 National Survey of Children’s Health, an estimated 7% of children aged 3-17 have occurrences of anxiety each year.⁸
- During the fall of 2018, 29.5 percent of college students in the U.S. reported that they had felt overwhelming anxiety within the past 2 weeks, and 18.9 percent reported experiencing anxiety in the past year.⁹
- The Psychiatry & Behavioral Health & Learning Network shares that anxiety disorders may be grossly underreported, as one study¹⁰ reports the discrepancy between retrospective self-reporting vs. diagnosis—showing number of cases was higher than patients previously discussed openly. See below:
 - ◇ Major depressive disorder: 4.5% vs 13.1%
 - ◇ Obsessive-compulsive disorder: 0.6% vs 7.1%
 - ◇ Panic disorder: 2.5% vs 6.7%
 - ◇ Social phobia: 12.6% vs 25.3%¹⁰

Guilt Versus Shame

I want to take a moment to share something personal. I believe that both guilt and shame can be triggers for negative head space and dark thoughts. Because of this, it is important for me to share how I see guilt and shame, and how we can work through them.

Guilt is the aftermath of an action. It can be healthy—as it lets us know *what we did* was wrong. Shame, on the other hand, is the cruel rebranding of our identity. It suggests that because of an action—we are somehow a different person. It seeks to stake a claim on *who we are*.

Guilt can be healthy. Our words, actions, and behaviors have consequences. Guilt helps us to take ownership, learn, and grow. Shame, however, doesn't offer a solution. It just grips our thoughts & emotions in a vice.

How do we escape the trap of shame? I want to continue this critical conversation in the video below.

Guilt Versus Shame - Video Discussion

<https://youtu.be/sRzXXuxH-XE>

YOU'RE BRAVER
THAN YOU BELIEVE,
AND STRONGER
THAN YOU SEEM,

AND
SMARTER THAN
YOU THINK.
A.A. MILNE

Is It Okay To Talk About Anxiety?

Yes. It is absolutely okay to talk about anxiety. There is no reason let a sense of shame or guilt silence you or someone you care for.

The reasons why individuals face anxiety range from short-term incidents to life altering events. Some of these are internal. Others are external.

The reason, cause, or longevity behind each story affected by anxiety is valid—and we acknowledge mental health can create major hurdles on the path to seeking wholeness. But that does not mean we do not fight—and fight well.

One of the ways we do that—is to talk about it.

Four Individuals Who Said Its Okay:

Michael Phelps Olympic Athlete - Video: https://www.youtube.com/watch?v=iQGEc-JD3_g

Patti Murin, “Frozen’s Anna on Broadway” - Video: <https://www.youtube.com/watch?v=nNKJhfLvgc0>

What To Do If Someone Shares About Anxiety

Learning that someone you care for wrestles with mental health can be painful. No one wants a friend or loved one to feel intense internal or external pain.

The reasons, cause and effect behaviors, and thoughts and emotions which lead someone to think dark thoughts range from short-term triggers to extreme inner distress. As you lean in and learn more, you can enter into conversations with a healthy perspective. In order to do so, we suggest to:

- Avoid Judgment
- Process First
- Educate Yourself
- Acknowledge Further Incidents

For a more in-depth discussion about these points, check out the video below.

What To Do When Someone Shares? - Discussion

<https://youtu.be/b5q74cH4Vcs>

Is It Betrayal If I Ask About Someone's Anxiety?

If you believe someone you care for is struggling with their mental health, it can be easy to become frozen, unsure what to do or how to help. It may even feel as if intervening would make things worse.

I know—because I have been there myself. But, there have been a few key factors which have helped me work through the options and know what is right.

My Personal #1 – If it feels like time to act—it probably is. In truth, it is usually fear of repercussions which holds me back more than reasoning which says it is time. Over the years, I have learned to trust my gut.

At times, mental health struggles are paired with situations of physical harm or danger, which leads me to the real #1.

The Real #1 – If you are a mandated reporter, and you learn someone within your influence is in an threat of physical harm or danger—either at their own hand or someone else's—it is time to act.

Legal requirements vary from state to state. I would encourage you to check with your local laws and follow the stated course of action. That being said—make sure you also are following your organization's policy and procedures to make sure the right people have been informed and the person you care for is receiving the best form of support and guidance from your whole team.

But, What If I Am Concerned About Family Or A Friend?

The truth is, there are not policy and procedure guidelines for relationships. And intervening can have ramifications for that person—and your relationship. This is valid. It is something which must be discussed.

I do not know all of the ins and outs of your specific situation. But, you can talk with someone who can give direct guidance for what you are facing, provide you with educational tips which match your situation, and help you feel confident in taking your next step.

This is why I highly recommend you calling a hotline. They can help you gauge the situation and know what your options are to get someone help. As always, if you believe someone is in immediate threat of harm that you should call 911 immediately.

Yet, the question remains, “What about backlash?” Let’s discuss the matter in the video below:

Is It Betrayal If I Intervene? - Video Discussion

What Kind Of Help Exists?

Due to the intensive nature of anxiety and the fact it speaks to deep internal struggles, finding help for anxiety usually begins by sharing with a skilled professional. This often happens after someone tells a trusted individual life who can help them connect with that skilled professional.

If you are the individual they turn to, be sure to encourage them. Reiterate that anything which is locked inside of their thoughts and feelings deserves a place to be processed in a safe environment which can give them actionable guidance and tools.

Additionally, there are a host of tools which can help you both find steps to taking action. These include:

- Apps Which Offer Mental Health Support
- Communities With Offer Support
- Finding A Professional

What Kind Of Help Exists? - Video Discussion

UNKNOWN AUTHOR

A Conversation On Anxiety Medication And Natural Remedy

When thinking about sharing a story with a support professional, we may believe the first thing they will do is prescribe talk therapy or medication.

This is likely to be true. If that concerns us, it might help to do a little bit of research in order to understand what it means to take medication, the side effects, and what you can expect when considering options.

In the video below, we have links to articles and voices which are more qualified to share.

Please note: In the instance of anxiety, it is likely individuals could need more guidance and tools than depression or anxiety medication alone. This conversation is only offered as a means of alleviating the unknowns about medication and alternative options. Please consult with a medical doctor for all decisions regarding health and mental well-being.

What Is The Right Type Of Help? - Video Discussion

<https://youtu.be/Vnch5AvmWAM>

Reiterating Why You Offer Support

When an individual struggles with anxiety, they often are caught in a mental battle of wondering why they are worth your time, effort, or love.

The question in their mind constantly is, “Why someone would want to help me?”

They may also believe help will be temporary until someone sees them as a burden or as a person who is just “too much.”

Because of these factors, it is important for those offering support to be a continual source of reassurance in why you want to support them—why you want to see them reach a place of wholeness.

This does not mean they dictate our lives or we cater to every whim. That is not what I am talking about. Healthy boundaries are important in every relationship, even ones which have serious complications in the midst.

Yet, I believe one of the best things we can do for someone who is struggling with mental health is to continuously and consistently reiterate *the why* behind our actions.

So, “Why would anyone want to help someone who is fighting to shift the story of anxiety?”

I wholeheartedly believe it is because our care for that person gives us compassion and insight into three things: their future, their pathway, and their value.

Their Future

You have an intrinsic belief that as someone you care for walks a path of wholeness and healing—they have a future.

Their Pathway

You may not have the professional skill to offer the treatment or healing needed, yet you want to be with them on their pathway as they seek it out. You want to offer tangible guidance and see them win in the journey.

Their Value

You have a foundational belief—that the person you care for has value. When you speak with them—it is directly tied into a personal reason why you believe they matter, have importance, and that the outcome of their life is important to you.

Reiterating Why You Offer Support - Video Discussion

<https://youtu.be/fP4Xpr9jDz0>

The Obstacles In Offering Help

It is fair to talk about the obstacles someone you care for may meet along their journey. It is incredibly tough to watch them face one or all of the following. I acknowledge the fact these moments can create tremendous setback or make it difficult for them, or maybe even you, to want to continue to fight for wholeness. I encourage you to continue to seek support and encouragement for yourself as you journey alongside of them. May you have the strength to continue to fight on.

- Help Seems Hopeless
- A Question Of Worth
- Lack Of Energy
- Disappointing Attempts

For a more in-depth discussion about these points, including guidance on how to overcome them, check out the video below.

The Obstacles In Offering Help - Video Discussion

<https://youtu.be/P3DTsdnz8hA>

Am I A Failure If Someone I Care For Won't Stop Thinking This Way?

If someone you care for is engaging in nonstop anxiety, it can be incredibly painful.

You likely have noticed your own sense of worry, fears, and emotions for that person. This is natural, because you love them and want them to be healthy.

But the one thing we don't talk about is the fact that beneath all of this, you may also feel a sense of failure.

If you feel as if you have failed at being a good friend or supportive loved one because the individual you care for has not changed, I want you to know I understand. Your feelings are valid. But, you are not a failure.

In this instance, we need to change the parameters for what true success and failure really are. Let's continue the conversation in the video below:

Fighting The Feeling Of Failure - Video Discussion

What To Do When A Loved One Pushes Back

Getting pushback when you try to help, is frustrating. As you engage with them, remember it is important to:

1. Go at their pace.
2. Own what is yours.
3. And yet, know this may not be about you.

Recognize pushback is often overcome by:

- Being consistent.
- Stating why you are for them.
- Reaffirming them.
- Apologizing for previous disappointments.

Lastly, be honest. It might be good to share how their behavior made you feel.

For a more in-depth discussion about these points, and how to overcome them, check out the video below.

When A Loved One Pushes Back - Video Discussion

Building A Mental Health Safety Plan

If you are taking a stand against anxiety, you know it often fights back. Taking action each time is a battle which is not easy. Yet, we hope having a pathway to fight back helps you continue to seek wholeness.

Please note: Even with the best of plans, there are times in which a crisis is stronger than our plan. In those moments, seek immediate, professional help. The following ideas on how to fight back are not intended to take the place of professional help.

One such resource which has a fantastic list of tools and resources for creating a safety plan is *Challenge The Storm*. You can check out their advice here: <http://challengethestorm.org/safety-plans-mental-health/>

They even have a sample plan that any of us are able to use to help us learn how to build our own plan. You can check that out here: <http://www.knowresolve.org/docs/safety-plan-web.pdf>

Building A Safety Plan - Video Discussion

Offers a second safety plan print off, with tools and resources from the UK.

Therapist Aid

<https://www.therapistaid.com/therapy-worksheets/suicide/none>

Offers free worksheets for building a self-harm safety plan, suicide assessment, and warning signs.

Nick's Experience With Using A Safety Plan

https://youtu.be/jW2Hvv_vN40

One young man's story of how he uses a safety plan in times which feel challenging.

The Goal Is Wholeness

Wholeness is about a state of contentment and peace in a life. It doesn't eliminate the past or any previous pain, instead it acknowledges how that pain has affected us—all while striving to form a new narrative.

Wholeness is about freedom—and I believe it is possible for each individual to discover for themselves.

Is it easy? Not at all. The pathway can be long and come with obstacles which may make us feel as if we may not make it.

But with the right support and tools—I intrinsically believe we can.

I welcome you, and those you care for, to find it.

The Goal Is Wholeness - Video Discussion

<https://youtu.be/tG18UzeL26w>

Identity Goes Beyond The Struggle

In the core of who I am—I am convinced none of us are defined by our struggles. Our identity goes far beyond what anyone stole from us, did to us, or how they disappointed us.

While it may be true you or someone you love has faced a deep struggle or have been treated in ways they did not deserve, I believe it does not have to be the key identifier of what makes an individual—them.

Wholeness is still available. Though it requires a journey, it's a pathway to be free of pain's influences—as if it was the only thing to define a life. I believe each of us still have life in front of us and it is filled with the ability for hope, the ability to make a difference in other's lives, and the ability to go out there and have positive and meaningful impact.

Identity Goes Beyond The Struggle- Video

<https://youtu.be/CnMJlc8PIRE>

Your Invitation To Shift The Story

If you, or someone you care for, are looking for a way to walk a journey to shift an incomplete story towards truth, you are invited to change your narrative.

Come on a journey through twenty video-based pathway markers which offer guidance on how you or someone you care for can seek wholeness. Change Your Narrative believes everyone has the right to be able to take back the pen of your story.

Come On A Journey To Find Wholeness...

<https://www.youtube.com/watch?v=ThTdleKhcCY&t=6s>

Please Note:

All statements and views within this book, the **change your narrative** website, and the videos on our YouTube channel are strictly opinion based. They are not intended to be utilized as professional treatment or care. If you or someone you care for struggles with mental illness, depression, suicidal thought or destructive life choices, I highly recommend seeking out professional help.

If you are in immediate harm or danger call 911.
